- Splash back option on all models
- Dry models available

### THE ULTIMATE COOKING STOVE

With this stove Thermalux offers a genuine four (4) oven cooking stove with true Grand Cuisine cooking facilities. The oven temperatures are independently adjustable, the fire box is large, huge hotplate, two (2) simmer plates and a drop scone or pancake hotplate which can be easily removed to place a wok directly on the flames. Like all Thermalux the ovens are self cleaning.

The Grand Cuisine is the perfect cooker for the serious cook, entertainer or commercial application and for the replacement AGA market being half the price and Australian made.

The Grand Cuisine is also available as a central heating cooker with enough hot water production to comfortably heat a 16 square home.

100% AUSTRALIAN

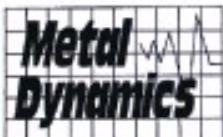

### THE PERFECT FAMILY COOKER

The Thermalux Supreme is a high quality, two oven, slow combustion cooking stove with the largest hot plate and oven of any major cooking stove on the market. The original Thermalux Supreme was launched onto the market over thirty years ago.

The Supreme is built to last and is constructed from cast iron, heavy gauge steel and stainless steel components. The ovens are self cleaning and self venting, and provides even all round oven temperature for perfect baking. The hotplates have space for six or more saucepans. Dual air controls together with flue damper and dilution controls provide swift response to temperature requirements.

The Supreme also comes as a central heating cooker. The Supreme CD (central heating cooker) has a heat output of 20 kw which gives the CD one of the best heat

outputs of central heating cookers. The CD has an additional air control which provides for greater combustion. The Thermalux CD will run 10 to 15 radiators or under floor coil heating to heat up to a 20sq house.

100% AUSTRALIAN

### TO COMPLEMENT THE PERFECT COUNTRY KITCHEN

Being a centrally flued single oven cooker, the Clarendon compliments the Thermalux range and is the perfect replacement for the aging Everhot and IXL stoves.

The old world charm of a Clarendon Colonial with splash back and Queen Anne style legs is perfect for that country kitchen or restored Victorian or Edwardian cottage.

The Clarendon is an extremely fuel efficient small to medium sized cooker. With the option of standard cooker, on base cabinet or the Colonial on legs you choose the stove to suit your lifestyle.

# Thermalux

Australian made for Australian Conditions

Spoil yourself with delicious home cooking and the wonderful warm atmosphere provided by your Thermalux Slow Combustion Cooking Stove. All Thermalux Stoves are individually handcrafted by Master Tradesmen to ensure quality and individuality not achieved by mass production. Our Craftsman signs the products they have created.

Style is important. The Thermalux simple lines will suit all decor. Of all the appliances you buy in a lifetime your Thermalux, we believe, will last the longest and the style of the Thermalux will not date and will suit the changing trends.

Thermalux now have one of the largest ranges of combustion cooking stoves, hydronic central heating cookers and boilers on the Australian market, and offer five attractive colours, golden fire brown, metallic black, moss green, blue and charcoal.

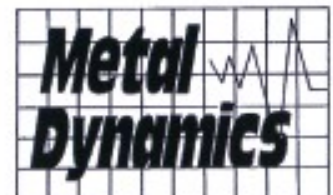

The Thermalux range offers the largest hotplate and oven size of the major brands and the huge firebox and ash pan gives excellent overnight burn times and provides generous amounts of hot water. Our stoves are specifically made for Australian conditions and fuel types and with top and bottom air intakes Thermalux are super responsive.

With many years of experience our designers and product development people understand the importance of building stoves that are user friendly.

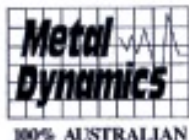

The messy cleaning required on most imported cookers has been eliminated using clever design features developed by experienced service technicians. In fact the simplicity of design cuts cleaning time by up to 80%. Low maintenance, with very few and inexpensive replacements parts and because Thermalux is made in Australia, you do not have to wait while parts come from overseas, and most importantly Thermalux provide a quality product at a much lower price than imported products. All stoves include a full set of instructions and operating tools.

As a way of saying thankyou to Thermalux customers, metal Dynamics send a free gift to all Thermalux owners on return of the warranty card. Thermalux also offer an information help line for those who do not have easy access to their local dealer.

At Thermalux we do not believe in buying Australian made simply because it is Australian, however if the Australian product is equal to or superior than the imported product and less expensive then what better reason to buy Australian made.

100% AUSTRALIAN

## EXCELLENCE IN INNOVATION

### PROVIDE A FOCAL POINT FOR THE FAMILY.

Thermalux stoves are functional, attractive and affordable. All Thermalux cookers have been tested to Australian and New Zealand Standards. When other manufacturers copy your features

you know you are a market leader. With over thirty years of refinement and development and an increase in export enquiries, Thermalux is truly a world class Australian product.
